

Language & Literature 2015-2016

I'm glad that I decided to take an advanced English course here at Edison. It helped me to develop and improve my writing and reading skills, and it has increased my confidence when considering college, applications, and things that will come my way in life!

-Edison Student

I came here when I was a freshman and I didn't know any English. Edison English teachers have really good ideas, strategies, and just teaching skills in general that have helped me develop my English. The support and patience I receive from them is incredible.

-Edison Student

As a 9th grade teacher at Edison, I believe the work that what we do in the Middle Years Program provides a strong foundation for every student to have access to advanced courses. Students enhance their literacy skills and learn to listen and appreciate perspectives that are different from their own.
